

NEWSLETTER POLARIS

Predicting Optimal Cancer Rehabilitation and Supportive care

IN THIS EDITION

- ◆ Collecting studies for first analysis
- ◆ Study inclusion POLARIS

DECEMBER 2014

In the Christmas edition of the POLARIS newsletter we present you the progress of the study inclusion. To date, 36 studies are included in the POLARIS database of which 18 studies are physical activity interventions, 14 are psychosocial interventions and 4 are mixed interventions.

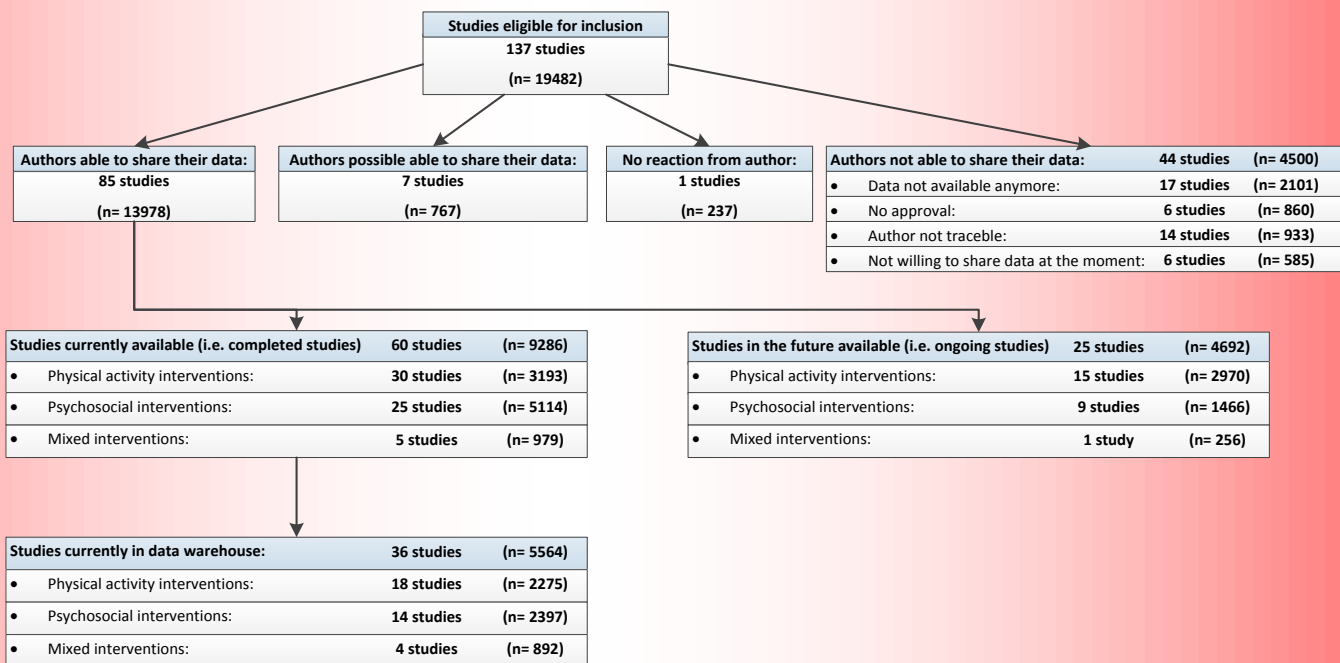

2015 is going to be a very exciting for POLARIS! We will start with the first effect and moderation analysis and the first publications will be written!

First effect and moderation analysis

At present, we have included 36 studies. We are currently in contact with principle investigators of 24 studies who are very interested in joining the POLARIS consortium and to share their data. We hope to include these studies as soon as possible to be able to start with our first analyses evaluating effect and moderators of physical activity and psychosocial interventions on health-related quality of life. We have planned to start analyzing on March 1st 2015.

Study inclusion

We would like to wish you all a Merry Christmas and a very happy New Year!

The POLARIS Steering Committee,

Laurien Buffart, Hans Brug, Irma Verdonck-de Leeuw, Joeri Kalter, and Maike Sweegers
